Testing, Navigation and Linking Vulnerable Populations

Creating Active Partnerships:

Department of Public Health

Hep C Provider Network Clinics

HIV Testing Network

Low Income Housing Organizations

Jail House Services

Adult Shelter System

Methadone/Substance Use Treatment Organizations

Testing, Navigation and Linking Vulnerable Populations

To Summarize Glide's approach:

Nurture a strong collaborative partnership with the local DPH

Harm Reduction is essential to engage active drug users and other high risk groups.

We serve our clients best by literally meeting them where they are at.

Use Outreach to provide direct services to marginalized populations as well as to recruit clients and to promote all programs that they may wish to access.

Integrated Programing ensures a more convenient service model for the client and reduces cost.

Partnerships improve your ability to reach the target populations – partner wisely!

Understand your capacity, e.g. with X amount of Testing, you will require XY amount of Navigations Services, so staff accordingly.
